## EXPERIENCE

### SOFTWARE ENGINEERING PROJECTS

#### FIXUP

- A work space app tailored for small businesses.
- Full-stack application with React on the client-side, Express & PostgreSQL on the server-side, and deployed on Vercel.

#### TO-DO APP

- My first TypeScript Project: A simple and efficient to-do app built with React and TypeScript.
- Integrated with JSON.Bin API for seamless data storage, allowing users to effortlessly add, edit, and remove tasks from the task board

#### MOVIESPLUS

- Movies app with user registration and saved movies list functionality.
- Full-stack application using React, Tailwind, Apollo, GraphQL & MongoDB.

#### CONTACT MANAGMENT

- App to efficiently manage imported contacts from various devices, enabling import, storage, editing, and deletion of Vcard files.
- Full-stack application developed with React Native, Node, and PostgreSQL.

#### PLAN MY PLATE

- Meal planning app with integration of third-party APIs.
- Built using React and Firebase, and deployed on Netlify.

#### TALKER'S

- A powerful CRUD web application with a database backend.
- Developed using JavaScript, Express, Ejs, PostgreSQL, and NPM dependencies.

#### MOBILIA BUISNESS

- Static web page showcasing Mobilia Furniture Business.
- Built with HTML, CSS, SASS, and Bootstrap.

### MORE EXPERIENCE CUSTOMER SERVICE STAFF
