PROFILE

I am seeking a mid-level full-stack software engineering position, specializing in React, PHP, .NET, and Azure Cloud. With experience in the telecommunications and service industries, I have developed expertise in data processing, CRM management, and optimizing workflows to deliver efficient solutions.

My legal background has further honed my communication, conflict resolution, and strategic leadership skills. This combination of technical and professional experience enables me to drive collaboration, solve complex problems, and support organizational growth effectively.
